Indicate Category:

Each educational level will be judged in three categories. Students MUST select from one of the following three categories:

Research Based Project:

- A systematic investigation used to generate generalizable knowledge about a phenomenon

Evidence Based Projects:

- This category includes projects which exemplify the use of best evidence from research, practice and patient preferences to influence the provision of high quality care
- EBP projects start with a clinical problem or quality concern, evaluate the literature for best practices related to the concern, and implement evidenced based practice, system, and/or policy changes to address the concern
- EBP projects should highlight recommendations for clinical practice, future research, and policy change

Evidence Based Literature Review:

- The EBP literature review is a thorough review of the literature related to a clinical problem
